

Central Board of Secondary Education

Modern Scholar's Academy affiliated with the Central Board of Secondary Education and students are prepared for the All-India Secondary School Exams (Class X) and the All India Secondary School Certificate Examination (Class XII).

Our seminal approach to education prepares our students to excel in the Board Examinations, making Modern Scholar's Academy best CBSE schools in India.

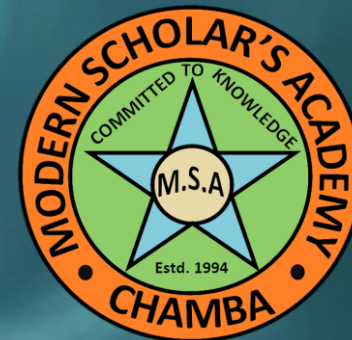

The core curriculum gives a competitive edge to our young learners. At Modern Scholar's Academy of Schools, the learning objectives of the CBSE board are successfully combined with our philosophy of focusing on our students' learning needs.

The graded system of evaluation is the most current in a series of examination and evaluation reforms that CBSE has implemented. Our curriculum's main goal is to modernise teaching-learning techniques by creating paradigms that are helpful to students. In support of this, we emphasise on: Easy and stress-free assessment tools that value our students' creativity and help teachers assess their cognitive skills. Integrating skill learning by adding job-oriented inputs to our curriculum. Our teachers regularly update their pedagogical skills by attending service training programmes and workshops.

The CBSE curriculum at Modern Scholar's Academy of Schools is based on:

- Integrated Curriculum
- Interdisciplinary Approach
- Experiential Learning
- Research Work

Primary School: The curriculum is designed to draw from their experiences and meet the cognitive and socio-emotional needs of the child. The teachers foster an atmosphere that is personalized and child centered. A lot of stress is laid at this stage on spoken English with emphasis on good pronunciation and diction coupled with excellent reading and writing skills. Field trips and Inter House Competitions are organised regularly to make learning fun and meaningful.

Middle School: Middle school provides a nurturing, secure, and supportive environment that motivates young adolescents to take on challenges in a culture of nurtured risk-taking as the children transition from childhood to adolescence. They are forced out of their comfort zones to develop their character, resiliency, and strong problem-solving abilities. The academic curriculum in middle school places a strong emphasis on inspiring students to become independent learners and broaden their knowledge and skill sets. Middle school curricula also attempt to promote deep and critical thinking in our students.

Secondary School: For the secondary classes i.e., Grades 8 to 10, the main aim is to provide in-depth knowledge of the concepts. Extensive use of technology supplements classroom teaching thereby making it interactive and thus enhancing comprehension. The school offers CBSE-recommended schoolbooks and study materials for the students. Our students can avail of supplementary books and sample question papers for greater success in examinations conducted by the Board. The activity-based curriculum and the various teaching aids used by our school facilitate a wholesome learning experience for our young geniuses.

Senior Secondary School: For Senior Secondary i.e., Grades 11 and 12, the main aim at this level is to prepare students according to the CBSE curriculum. Experienced teachers strive to achieve excellent results through a result-oriented approach to teaching. Students can choose subjects of their choice from several subjects offered. Modern Scholar's Academy supports students identify their potential as they prepare to enter the world of work and responsibility. In the process of learning and self-motivation, the students evolve as discerning young adults with values and principles that contribute to the community and the environment.
